1. Applicant's election without traverse of the invention of Group I in Paper No. 8 is acknowledged.
2. Claims 11-14 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made without traverse in Paper No. 8.

The oath or declaration is defective because: the reference to provisional application 60/340,416 appears inconsistent with PTO records.

Drawings

4. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(4) because reference character "44" has been used to designate both "fiber-optic cable" and "trench"; reference character "46" has been used to designate both "primary buffer layer" and "water column"; reference character "48" has been used to designate both "secondary buffer layer" and "water column". (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effect under this subsection of a national application published under section 122(b) only if the international application designating the United States was published under Article 21(2)(a) of such treaty in the English language; or

(2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that a patent shall not be deemed filed in the United States for the purposes of this subsection based on the filing of an international application filed under the treaty defined in section 351(a).
